Bangor Hydroelectric Company; Notice of Intent To Prepare an Environmental Assessment and Notice of Solicitation of Written Scoping Comments

June 23, 1997.

The Federal Energy Regulatory Commission (Commission) has received an application from the Bangor Hydroelectric Company (Bangor Hydro) to relicense the Medway Hydroelectric Project No. 2666-007. The 3.44-megawatt project is located on the West Branch of the Penobscot River in the town of Medway, Penobscot County, Maine.

The Commission intends to prepare an Environmental Assessment (EA) for the project in accordance with the National Environmental Policy Act.

In the EA, we will consider reasonable alternatives to the project as proposed by Bangor Hydro, and analyze both site-specific and cumulative environmental impacts on the project, as well as, economic and engineering impacts.

The draft EA will be issued and circulated to those on the mailing list for this project. All comments filed on the draft EA will be analyzed by the staff and considered in a final EA. The staff's conclusions and recommendations presented in the final EA will then be presented to the Commission to assist in making a licensing decision.

Scoping

We are asking agencies, Indian tribes, non-governmental organizations, and individuals to help us identify the scope of environmental issues that should be analyzed in the EA, and to provide us with information that may be useful in preparing the EA.

To help focus comments on the environmental issues, a scoping document outlining subject areas to be addressed in the EA will soon be mailed to those on the mailing list for the project. Those not on the mailing list may request a copy of the scoping document from the environmental coordinator, whose telephone number is listed below.

Those with comments or information pertaining to this project should file it with the Commission at the following address: Lois Cashell, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426.
